

PONOKA REGULATED RATE PROVIDER CHANGE

ENMAX chosen to assume role of Regulated Rate provider

The Town of Ponoka offers a Regulated Rate Tariff to electric customers in its service area that have not selected a competitive electricity offering from one of the many retailers in Alberta.

Effective June 1, 2009, ENMAX Energy Corporation will be providing this service for the Town of Ponoka. Only electricity customers currently on the Regulated Rate Tariff are affected by this change of service providers. Customers who have signed a contract for a competitive electricity offering will not see any changes.

Regulated Rate Tariff customers will receive electric bills from ENMAX for consumption from June 1, 2009, at rates approved by the Town of Ponoka. Additional information related to billing will be communicated to customers in the coming weeks.

All customers on the Regulated Rate Tariff continue to have the option to choose a competitive electricity offering and can find a complete list of retailers on the Alberta Government website at www.ucahelps.gov.ab.ca.
