- Vacuum all the bathroom, kitchen, and range hood vents so the fan motor doesn’t have to work so hard to move air, and excess moisture, out of your home.
- Check your clothes dryer lint trap and outside vent to ensure no lint has built up and blocked the exit.
- Examine the weather-stripping around all doors, including your patio door, garage doors, and around all windows. Replace weather-stripping that is no longer working properly.
- Check all caulking and replace any dried, shrunken, or broken beads.
- Check window wells for flooding.
